MONROE PUBLIC SCHOOLS BOARD OF EDUCATION

Work Session

Tuesday, December 10, 2013

5:30 p.m.

MINUTES

Roll Call and Call to Order

Board Members Present: President Robert Yeo, Vice President Larry VanWasshenova, Secretary June Knabusch-Taylor, Parliamentarian Aaron N. Mason, Trustee Ryan Philbeck, and Trustee Wendy Spicer

Board Members Absent: Trustee Dr. Tedd March

Administrators Present: Barry Martin, Julie Everly, Ryan McLeod, Katherine Eighmey, Jerry Oley (arrived at 6:04), David Payne (arrived at 6:05)

Administrators Absent: None

President Yeo called the meeting to order at 5:32 p.m.

Closed Session

Motion by Mr. VanWasshenova support by Mr. Mason to convene in closed session for the purpose of discussing worker's comp claim. (Open Meetings Act, Section 8c.)

Vote: Motion carried by a 6-0 hand vote at 5:32 p.m.

Reconvene in Open Session

Motion by Mr. Mason; support by Mr. Yeo to reconvene in open session of the Monroe Public Schools Board of Education work session.

Vote: Motion carried by a 6-0 hand vote at 6:05 p.m.

District Finances

Kathy Eighmey provided an update on the 2013/14 financial position of the district and talking points on possible budget reductions. Mrs. Eighmey will present a budget amendment at the second Board meeting in January.

Community Relations

Due to time constraints, Mr. Vergiels will present his information at the Superintendent Goals workshop immediately following tonight's Board meeting.

Adjournment

Motion by Mr. Mason; support by Mrs. Knabusch-Taylor that the 5:30 p.m., December 10, 2013, Work Session of the Monroe Public Schools Board of Education be adjourned.

Vote: Motion carried by a 6-0 hand vote at 6:59 p.m.

MONROE PUBLIC SCHOOLS BOARD OF EDUCATION

Board Meeting #22

December 10, 2013

7:00 p.m.

MINUTES

Roll Call and Call to Order

Board Members Present: President Robert Yeo, Vice President Lawrence VanWasshenova, Secretary June Knabusch-Taylor, Parliamentarian Aaron N. Mason, Trustee Ryan Philbeck, and Trustee Wendy Spicer

Board Members Absent: Trustee Dr. Tedd March

Administrators Present: Barry Martin, Ryan McLeod, Katherine Eighmey, Jerry Oley

Administrators Absent: Julie Everly, David Payne

President Yeo called the meeting to order at 7:05 p.m.

Student Art Projects

Mary Ann Cyr, Raisinville principal, and art teachers Steve Simon, Bonnie Ritsema, Melissa Cramer and Pam Mathews were present to introduce elementary art students whose work is on display for an entire year on the walls of the board room. These works of art have also been on display at the Mall of Monroe Art Show as well as at the Monroe County Fair. Each student stood by their art project for pictures and received a certificate of merit.

Recess

A short recess was called to enjoy refreshments at 7:15 p.m. The meeting resumed at 7:27 p.m.

Public Commentary-Agenda Items Only

There was no public commentary at this time.

Approval of Minutes

Motion by Mr. VanWasshenova; support by Ms. Spicer to approve the minutes of the following meetings as submitted:

- November 26, 2013 Board Work Session
- November 26, 2013 Board Meeting #21
- December 2, 2013 Special Work Session
- December 5, 2013 Special Board Meeting (4 sets)

Vote: Motion carried by a 6-0 roll call vote.

Reports and Update

November 18, 2013 Board Curriculum Meeting Minutes were received without comments.

CSD-1 Testing on 40 District Boilers

Motion by Mr. VanWasshenova; support by Mr. Mason to accept the low bid of \$5,660 from Sieb Plumbing, Heating & Air Conditioning, of Monroe, Michigan to perform state required boiler testing and reject all other bids. Money for this purchase will come from the General Fund.

Vote: Motion carried by a 6-0 roll call vote.

Superintendent Comments

- The Education Foundation of Monroe Public Schools awarded ten mini-grants in its latest round of mini-grant reviews. It is the largest number of grants in at least five years. Grants were awarded for five iPods so students can record book reviews for their fellow school students at Manor Elementary, a laptop computer for special education students at Monroe Middle School participating in writer's workshop, and materials for a fragmentation box that Monroe High students can use to study how a superconductor works.
- The Monroe High School gym was the site of its first-ever state championship meet for First Lego League teams last Saturday. The gym was packed with representatives from more than 40 teams.
- Monroe Public Schools performers continue their musical presentations at local places for the next ten days. Besides our singers being on My 98.3 FM nearly every morning at 7:45 over the next two weeks, students representing Monroe Public Schools will or have performed at Greenfield Village, the Toledo Zoo and Matthes Evergreen Farm.
- The annual Madrigal Dinner will take place this Friday and Saturday at St. Paul's United Methodist Church performed by MHS Generations of Sound, under the direction of Cate Windelborn.
- Monroe High School will be prominently featured in an upcoming edition of Inside Monroe magazine. A two-page full color spread of art work done by students in Mrs. Amy McBroom's class will be featured in the January issue. That same issue will feature a two-page story by MHS senior and journalism student Ashleigh Jones about the dangers of texting and driving.
- A Christmas tree decorated by Custer kindergarten students has been judged the best tree at the Monroe County Historical Museum's annual festival of trees. The trees will be on display through the end of the year.
- Colton Procy, a 4-year-old student at Riverside Early Learning Center, won a nationwide turkey coloring contest for preschoolers that was sponsored by a school furniture vendor. Entries came from all over the country and Colton won in the pre-K category. Because he won, Riverside will receive a special presentation bookcase for Colton's classroom.
- All administrators attended two days of coach training with Mr. Dan Newby this week. This training centered around understanding how relationships, having good listening skills, and being able to understand the role of emotions when working with people is critical to the coaching process and helping people be effective in their work.
- Tomorrow is our last one-hour early release for students in 2013.

Old Business

Mr. Mason suggested including a minimum number of teachers that could be reduced because of declining enrollment in the next budget projection.

New Business

Mr. Yeo suggested that Mr. Vergiels send board members his presentation via email instead of presenting at the workshop that will immediately follow this meeting.

Public Commentary-Any Topic

Selma Rankins, citizen, shared an article that was published in the Monroe Evening News regarding teaching diversity.

Adjournment

Motion by Mrs. Knabusch-Taylor; support by Mr. Mason that the December 10, 2013 Board Meeting #22 of the Monroe Public Schools Board of Education be adjourned.

Vote: Motion carried by a 6-0 hand vote at 7:42 p.m.

June Knabusch-Taylor, Secretary

Monroe Public Schools

1275 N. Macomb St.

Monroe, Michigan 48162

Dear Superintendent:

This letter is to inform you that I have chosen to resign from my position as a French and Spanish teacher at Monroe High School. Due to health reasons my resignation will be effective December 12, 2013. Details for my decision are attached to this letter.

Sincerely,

Lidia Talaba

TEACHER APPOINTMENT

BACKGROUND

On behalf of the administration and the interview panel I am recommending the appointment of Allison Kwasniak as a Teacher with Monroe Public Schools. Ms. Kwasniak will be assigned as a World Language Teacher at Monroe High School for the remaining 2013/14 school year.

Ms. Kwasniak holds a Bachelor of Art degree from the University of Toledo. She recently completed her student teaching at Monroe High School. She was previously employed as a Substitute Teacher through EduStaff.

Members of the interview panel were: Val Orr, Principal; Jessica Shultz and Otto Zillgitt, Assistant Principals.

ENCLOSURE

Resume

RECOMMENDATION

Move to approve the appointment of Allison Kwasniak as a Teacher with Monroe Public Schools effective January 6, 2014 and place on the appropriate salary level as contained in the Master Agreement, and upon completion of all pre-employment requirements.

Allison Kwasniak

December 16, 2013

To whom it may concern:

I would like to take this opportunity to express my interest in securing the Spanish/French teaching position within Monroe Public Schools. I am confident that the experience and knowledge I have gained at the University of Toledo and at Monroe High School make me an excellent candidate for this position. Your district is of particular interest to me because of the exceptional learning experience I have had as a student teacher with Katelyn Martin, the diversity of the student body and the administration's vision of school improvement through Professional Learning Communities.

I hope to be considered as a perspective candidate for the Spanish teaching position for a variety of reasons.

I have extensive field experience teaching all levels of Spanish for grades 9-12. Over the past year I have researched and implemented a variety of teaching methods: TPR, TPRS and Comprehensible Input, which have enabled me to achieve a high success rate in the classroom. I am a responsible, enthusiastic, dedicated and creative individual that truly cares about student success. I possess strong written and verbal communication skills, excellent computer skills, and solid classroom management practices.

During the past semester I served as a student teacher in Spanish classrooms at Monroe High School. I have enjoyed collaborating with teachers to implement student centered lessons that emphasize communication. I work passionately to create lesson plans that include best practices for the students and assessments that are aligned with the current Michigan/Ohio standards, benchmarks and the Common Core.

From partaking in the Soroptimist Club, sporting events and Monroe's Pride Night, my love for Monroe High has grown tremendously in a short amount of time. I enjoy the diversity of students Monroe has to offer and the challenge of working with each student to help them reach their full potential.

If there is any other information that would prove helpful as you consider my candidacy, do not hesitate to contact me at 419-304-5047. I know that I will make a valuable contribution to your school and I look forward to speaking with you. Thank you for your time.

Sincerely,

Allison Kwasniak

Allison Kwasniak

• **Objective:** To be a Spanish educator for Monroe High School.

• **Teaching Experience:** 9/3/2013- Present Monroe High School Monroe, MI

Student Teacher:

- Taught beginning, intermediate, and advanced Spanish to grades 9-12 primarily using TPRS in a classroom of 30-35 students

November 20, 2013

To Whom It May Concern,

I am interested in applying for the Dean of Student Services position in the Monroe Public School district. I believe I bring an energy level and unique understanding to the education environment when dealing with students. I have been at Orchard Center High School since last September in a similar position. I feel that my experience there and my well rounded background would make me a great fit for this position.

While my resume only reflects my recent experience in education I have worked in the school kitchen, volunteered with toddlers and been a day camp counselor at Calvary Christian School in Toledo, Ohio. I have also worked in a drug awareness program for teens where I taught sales techniques and customer service skills as well as supervised them on outings to basketball games and pizzerias. Most recently before working at OCHS, I worked at the Bedford Educational Child Care Center in Temperance, Mi. I worked with all ages from Toddlers to Kindergarten students.

When I was hired at Orchard Center High School, I felt that I had found my niche in education. I truly enjoy working with teens and especially the at risk youth population. I look forward to everyday challenges and triumphs that come with that environment.

I appreciate your time and consideration of my application and look forward to interviewing for this position.

Thank you,

Stephannie Cherry

Orchard Center High School

Behavior Coordinator

734-765-3700

Stephannie L. Cherry

TEACHER TENURE RECOGNITION

BACKGROUND

Teacher Tenure is granted under the Michigan Teacher Tenure Act when a teacher satisfactorily completes a probationary period. Under the revised statute, teachers hired since September of 1993 and prior to the 2011 amendment must complete a four year probation period, unless they have received tenure in another Michigan district. Under that condition, a two-year probation must be served.

At the end of this school year, Katie Collins and Kellie Skidmore-Baltrip will be eligible for tenure.

On behalf of the administration, I am pleased to report that these teachers have earned good evaluations and recommendation from their supervisor(s). Even though tenure is granted under the statute, the Board of Education is asked to confirm and endorse the granting of tenure.

ENCLOSURES

Tenure Recommendations

RECOMMENDATION

Move to confirm and endorse the granting of tenure for Katie Collins and Kellie Skidmore-Baltrip on the appropriate anniversary dates.

Administration Building

1275 North Macomb Street · Monroe, MI. 48162

Phone: 734-265-3000 · Fax: 734-265-3001

January 10, 2014

To Whom It May Concern:

It is with great pleasure that I write this recommendation to grant tenure for Mrs. Katie Collins.

Katie has been a preschool teacher in the Monroe Public School system for four years. She has been a wonderful asset to our teaching staff. She has worked very hard to complete the necessary requirements during her tenure period by establishing many positive relationships with students, parents and staff. Mrs. Collins has shown she is a dedicated professional who puts students first and is committed to lifelong learning.

I am very pleased to recommend Katie Collins for tenure.

As always,

Julie M. Everly

Assistant Superintendent of PreK-6 Curriculum and Human Resources

NOTICE OF NONDISCRIMINATION

It is the policy of Monroe Public Schools not to discriminate on the basis of race, color, national origin, gender, age, disability, religion, height, weight or marital status in its programs, services, employment, or any other activities. For information contact the office of the Superintendent, 1275 N. Macomb St., Monroe, MI 48162, (734)-265-3010

ESTABLISH DATES, TIME AND LOCATION OF BOARD OF EDUCATION MEETINGS

BACKGROUND

Enclosed is the Board Meeting calendar following the same pattern as the previous year. Workshops have been scheduled for one per month along with *tentative* Discipline Hearing dates. Alternating months will be Finance Committee of the Whole. It would be the Board's prerogative to add workshops in the open board meeting nights as needed.

ENCLOSURES

Proposed Board of Education Meeting and Committee Meeting Calendar

RECOMMENDATION

Move to establish meetings for the Monroe Board of Education from January, 2014 to January, 2015 with workshops to begin at 5:30 p.m. and regular meetings to begin at 7:00 p.m. on Tuesdays at the Administration Building, 1275 North Macomb Street, Monroe, MI 48162 as listed.

Monroe MI, 48162

MEMO

To: Dr. McLeod

From: David Payne

Date: 1/9/14

Subject: CTE Technology Purchase

We are recommending the purchase of the following equipment for Monroe High School CTE Department. This equipment will be utilized in the AutoCAD room by Mrs. Sweet and her students. The total amount of this purchase will not exceed \$9,995.00 and will be funded by the Perkins Grant. This package will include a Canon IPF815 MFP 44 inch Multi-Function Color Copier, Scanner, and Printer. This will replace the existing plotter that is no longer functional. The purchase also includes a three year warranty. I have included three quotes as well as documentation on this equipment. Professional Plotter Technologies was the lowest bidder and we are recommending the purchase through this company.

MFP

TECHNICAL DOCUMENTS

MFP LARGE-FORMAT IMAGING

Introducing the 36" and 44" imagePROGRAF MFP

Large-format scan-to-copy/file/e-mail solutions
for technical document environments.

Designed for AEC, CAD, and GIS technical documents and general use, the 36" and 44" imagePROGRAF MFP large-format imaging systems help unlock the full potential of your productivity. This complete workflow solution provides a fast and effective system for copying, archiving, and distributing maps, drawings, renderings, site and facilities management plans, design and layout proofs, technical documents, and more.

FEATURES

- This **complete workflow solution** includes a large-format scanner, printer, MFP stand, computer, and intuitive touch-screen interface
- **Customize your system** and choose a compact 36" iPF755/750/710 printer or 44" iPF825/815 printer for maximum versatility
- CIS Scanning Technology for **incredible line definition** and **accuracy**
- Maximum achievable scan speeds of up to **10 inches per second** for monochrome plain paper documents
- Comes standard with the ability to scan to **PDF, JPEG,** and **TIFF** file formats
- 2400 x 1200 dpi printing with precise 4pl ink droplets for **high image resolution, clarity, and detail**
- Economy Print Mode allows for **lower cost of operation**

imagePROGRAF MFP

ADVANTAGES

Featuring advanced imaging technologies, the 36" and 44" imagePROGRAF MFP systems are built for the way you work.

VERSATILITY

Customize your system without compromising your workflow. Choose a 44" large-format system for maximum versatility or a 36" printer for high-speed printing of D- or E-sized drawings with a reduced footprint. The imagePROGRAF MFP provides room for plain paper documents up to 41" wide (40" image width). And its unique paper path returns documents to the front, allowing for a space-saving design with front-accessible operation for flush wall installation. And with a **large, simple-to-use touch-screen interface**, one-touch scanning/copying has never been easier.

MAXIMUM PRODUCTIVITY

Whether it's construction plans, drawings, maps, or business presentations, speed is critical when deadlines are tight. The imagePROGRAF MFP is a powerful production tool for many environments, allowing you to scan up to **10 inches per second for monochrome** and up to 1.67 inches per second for color. Engineered for high-volume printing, Canon's advanced system architecture and one-inch print-head with 15,360 nozzles achieve outstanding print speeds.

HIGH-PRECISION SCANNING

The imagePROGRAF MFP uses CIS technology to capture the finest image detail in technical documents, maps, sketches, hand-annotated drawings, and complex schematics. With **true 600-dpi optical resolution**, achieve exceptional monochrome performance with very sharp, clean, black-and-white images and high-definition color reproduction. And dynamic preview ensures that scans and copies match original hard-copy documents every time.

HIGH-QUALITY OUTPUT

Print complex schematics with super-clear small text fonts and crisp lines over color backgrounds, even on uncoated technical papers. A super-high-density print-head ejects tiny 4pl droplets of ink that consistently produce **2400 x 1200 dpi output with fine lines within +/- 0.10% accuracy** and as thin as 0.02mm. And Canon's unique 5-color Reactive ink set delivers durable, smudge-resistant prints with sharp lines and text, bold colors, and smooth fills.

ADVANCED SOFTWARE

A solution isn't just hardware. SmartWorks MFP gives you all the tools you need to quickly and easily scan large-format technical documents to copy/file/e-mail. With a simple-to-use interface and unique scan-it-once ability, SmartWorks MFP allows for **efficient batch scanning** and ensures that top quality scanned images are produced in the least amount of time.

Scan drawings, share documents, make last minute changes, and meet critical deadlines. A fast and effective large-format, capture-to-output solution, the imagePROGRAF MFP keeps projects moving forward, helping you be more productive than ever before.

With four lines of imagePROGRAF solutions available, Canon has the answer for your large-format needs.

MEMO

To: Dr. Martin

From: David Payne

Date: 1/9/14

Subject: Arborwood Elementary Campus Security Pilot

We are recommending the approval to move forward with a security pilot at Arborwood South Elementary. This pilot would include security equipment in the amount not to exceed \$15,000.00. This purchase would be funded with General Fund monies. The equipment will be purchased through several vendors and tested in different scenarios until we are comfortable and confident before making a larger recommendation that would include all our schools and buildings. The information we gather from this pilot will help us determine the best plan to follow and incorporate it into a longer term plan of deployment. We are looking into three areas of security to implement during this pilot; Access Control, Video Surveillance, and Visitor Management.

Access Control

- This security enhancement will allow access into buildings without the use of keys. This will also let us know when doors are open or ajar. Another benefit to this system is the ability to buzz people in with a video entry intercom.
- iPhone is the product we will be piloting for this technology.

Video Surveillance

- We will be piloting new video equipment at Arborwood as many of our buildings have video surveillance but it is outdated, management is antiquated, and video quality is extremely poor.
- Video Insight is the company we would be piloting.

Visitor Management

- This technology will allow automated visitor management tracking and badge printing.
- Raptor is the company we will be piloting if approved.

I have included information on all listed technologies for your review. As this is a pilot we will be working closely with the administration at Arborwood campus to make sure this benefits and makes things more efficient for staff as well as creating a more secure and safe learning environment for our students. I will be at the Board Meeting to answer any questions or to explain this pilot in further detail.

IS Series

IP Video Intercom

Building Communication. Controlling Security.

IS Series helps save money

Control multiple functions from any location. For instance, when one building closes for the night, security can be managed from another location. School districts, businesses, and multi-building facilities can improve efficiency and decrease costs with centralized security and communication. The IS Series provides a wide array of features to meet the needs of a variety of applications. Control the IS System from anywhere on the network.

● Identify Visitors and Unlock Doors

Once visitor identity is established, unlock doors or gates from anywhere on the network.

● Internal Communication

Communicate easily between stations on the network, from within a building, or from across town.

● Broadcast Emergencies

Create areas and zones to easily broadcast emergency announcements quickly.

● Schedule Bells & Announcements

Program announcements by day, week, or month. Create different schedules for holidays, breaks, or after hours.

● Forward Missed Calls Automatically

If a master station is not answered, have the call forwarded to another master station as well as to an outside phone number, like 911.

● Start Small, Grow Large

IP Boxed Sets are a great introduction to the IS Series. Each box contains an IP addressable door station and either an IP addressable desktop master station or software master station. Easily expand by adding more boxed sets or by integrating with a hardwired IS System.

IS Series Solutions

Schools • Office Buildings
Campuses • Garages
Public Utilities • Hospitals

Door Stations

Entrances

Protect staff by giving them the advantage to safely confirm the identity of visitors before unlocking the entrance with door release.

PC Master Stations

Reception

Increase staff efficiency by controlling various entrances from a central location. Easily transfer responsibilities to another location or individual.

Master Stations

Internal Communication

Communicate between offices from within a building or with an office across town. Internally communicate using a standard or PC master station.

Subs & PA Systems

Rooms & Common Areas

Broadcast messages throughout the building or to a specified room or office with the choice of either a hands-free or handset reply.

Rescue Assistance

Open Areas

Provide campus wide peace of mind by installing assistance or emergency towers. Assess situations before dispatching personnel.

Remote Stations

Parking Garages

Identify and communicate with individuals at remote locations to determine if their access into the building is legitimate.

Scale the System!

The IS Series is the perfect system for any building size. Configurations can be simple to accommodate 1 door station and 1 master station and can grow to a larger system to include stations around the world.

Use as an Edge Device!

Connect directly to a mesh network for wireless capabilities.

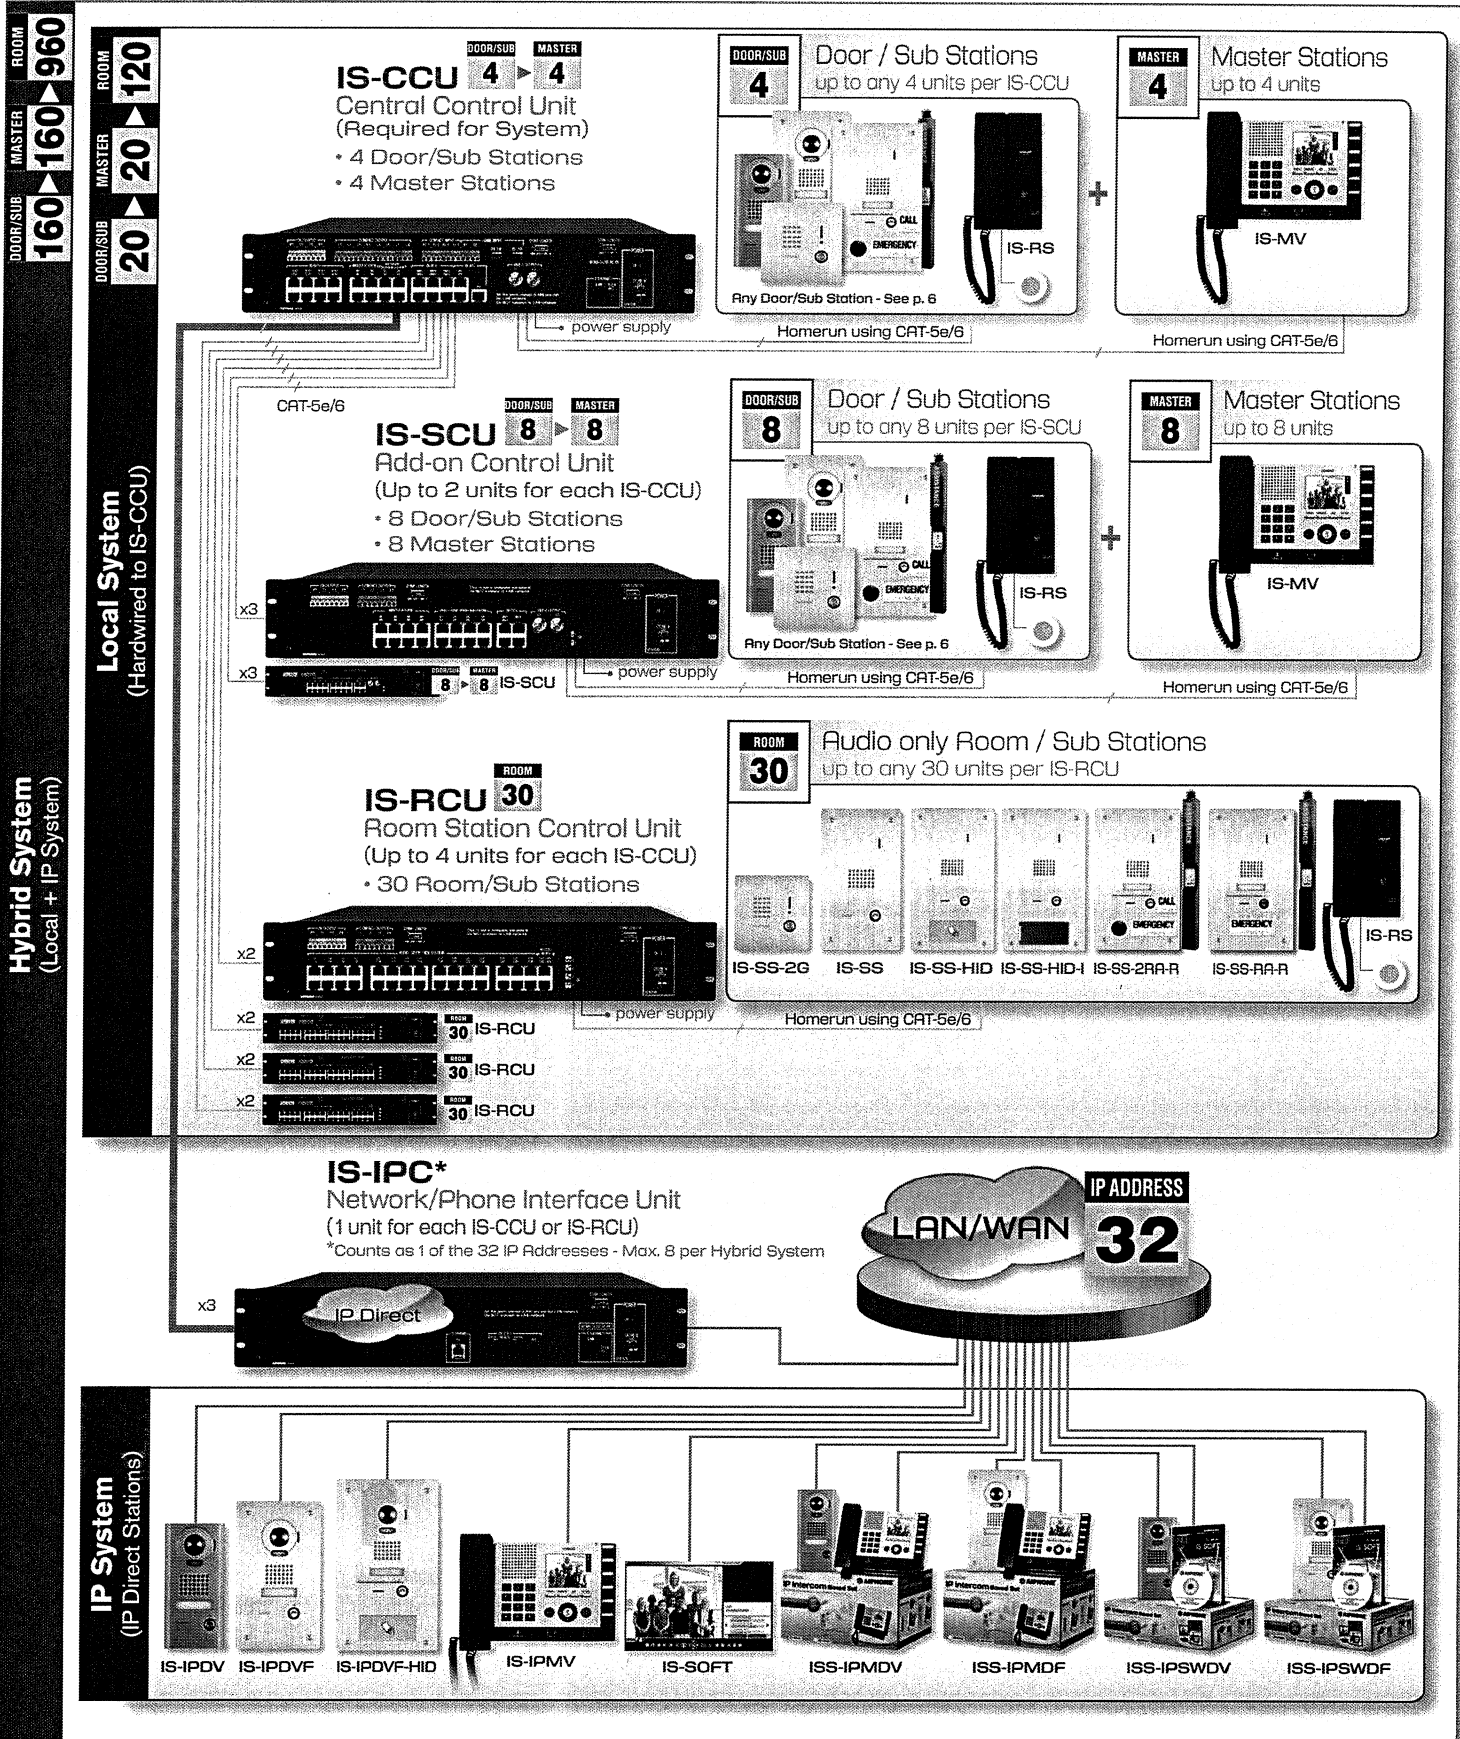

Zoom for clarity!

Digital Zoom with PanTilt control allows for clear identification.

IS Series Sample System Layout

Diagram is for illustrative purposes only. System wiring may vary by installation. Refer to instructions for actual installation directions.

Homerun stations to Control Units (**IS-CCU** or **IS-SCU**) via CAT-5e/6

Audio + Video
Door / Sub Stations

Form C contact for door release

- IS-DV**
Door Station
- PTZ camera
 - Aluminum die cast
 - Surface mount
 - Use optional IS-MB* for mullion mounting

- IS-DVF**
Door Station
- PTZ camera
 - Stainless steel
 - Flush mount
 - Mounting box included
 - Use optional SBX-ISDVF* for surface mounting

- IS-DVF-HID**
Card Access Door Station
- Same as IS-DVF
 - HID® ProxPoint® Plus proximity card reader
 - Use optional SBX-ISDVF* for surface mounting

- IS-DVF-HID-I**
Card Access Door Station
- Same as IS-DVF
 - HID® iClass® smart card reader
 - Use optional SBX-ISDVF* for surface mounting

- IS-SS-CI**
Door Station
- CCTV input
 - Stainless steel
 - Flush mount
 - Mounting box included
 - Use optional SBX-ISDVFRA* for surface mounting

Homerun stations to Control Units (**IS-CCU**, **IS-SCU**, or **IS-RCU**) via CAT-5e/6

Audio Only
Door / Sub Stations

Form C contact for door release

- IS-SS-2G**
Door / Sub Station
- Stainless steel
 - Flush mount
 - Fits standard 2-gang box
 - Use optional SBX-2G* for surface mounting

- IS-SS**
Door / Sub Station
- Stainless steel
 - Flush mount
 - Mounting box included
 - Use optional SBX-ISDVF* for surface mounting

- IS-SS-HID**
Card Access Door Station
- Same as IS-SS
 - HID® ProxPoint® Plus proximity card reader
 - Use optional SBX-ISDVF* for surface mounting

- IS-SS-HID-I**
Access Door Station
- Same as IS-SS
 - HID® iCLASS® smart card reader
 - Use optional SBX-ISDVF* for surface mounting

Homerun stations to Control Units (see below for specific control units) via CAT-5e/6 - Fiber Optic adaptor available for longer distances

Rescue Assistance
Sub Stations

- Wall Boxes****
Narrow 4" depth meets ADA wall mounting requirements
- 12 Gauge stainless steel

- Modular Towers****
Provides lower freight and installation costs
- 1/4" steel body
 - Approximately 90lbs per module
 - Zinc treated inside & out
 - Use IS-IFB* interface box for mounting IS Series RA stations to existing Code Blue® or Talk-A-Phone® Towers or Wall boxes

**Strobe lights require additional power supply (PS-2420UL*)

- IS-DVF-2RA**
ADA Compliant Audio + Video RA Station
- PTZ camera
 - Lettering & Braille signage
 - LED call status indicator
 - Dual call buttons
 - 2 form C relay outputs
 - Stainless steel
 - Flush mount
 - Mounting box included
 - Homerun to IS-CCU or IS-SCU only

- IS-SS-2RA**
ADA Compliant Audio Only RA Station
- CCTV input
 - Lettering & Braille signage
 - LED call status indicator
 - Dual call buttons
 - 2 form C relay outputs
 - Stainless steel
 - Flush mount
 - Mounting box included
 - Homerun to IS-CCU or IS-SCU only

- IS-SS-2RA-R**
ADA Compliant Audio Only RA Station
- Lettering & Braille signage
 - LED call status indicator
 - Dual call buttons
 - 2 form C relay outputs
 - Stainless steel
 - Flush mount
 - Mounting box included
 - Homerun to IS-CCU, IS-SCU, or IS-RCU

- IS-SS-RA**
ADA Compliant Audio Only RA Station
- CCTV input
 - Lettering & Braille signage
 - LED call status indicator
 - Single call button
 - 2 form C relay outputs
 - Stainless steel
 - Flush mount
 - Mounting box included
 - Homerun to IS-CCU or IS-SCU only

- IS-SS-RA-R**
ADA Compliant Audio Only RA Station
- Lettering & Braille signage
 - LED call status indicator
 - Single call button
 - 2 form C relay outputs
 - Stainless steel
 - Flush mount
 - Mounting box included
 - Homerun to IS-CCU, IS-SCU, or IS-RCU

Homerun station to Control Units (IS-CCU, IS-SCU, or IS-RCU) via CAT-5e/6

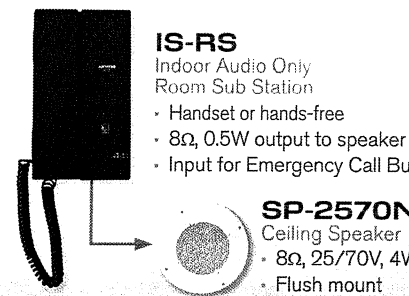

Room Sub Station

IS-RS
Indoor Audio Only Room Sub Station

- Handset or hands-free
- 8Ω, 0.5W output to speaker
- Input for Emergency Call Button

SP-2570N
Ceiling Speaker

- 8Ω, 25/70V, 4W
- Flush mount

Homerun station to Control Units (IS-CCU or IS-SCU) via CAT-5e/6

Master Station

IS-MV
Audio + Video Master Station

- 3.5" LCD display
- Handset or hands-free
- Door release
- Composite video out
- Desk stand included (also wall mountable)

Interconnect Control Units using CAT-5e/6

Control Units

IS-CCU
Central Control Unit
Accommodates:

- 4 Door / Sub Stations
- 4 Master Stations
- 2 IS-SCU's
- 4 IS-RCU's
- 1 IS-IPC

IS-SCU
Add-on Control Unit

- Connects to IS-CCU (up to 2 units per IS-CCU)

Accommodates:

- 8 Door / Sub Stations
- 8 Master Stations

IS-RCU
Room / Sub Control Unit

- Connects to IS-CCU (up to 4 units per IS-CCU)
- Can be used alone in an audio only system (IS-MV can be used as an audio only master station)

Accommodates:

- 30 Audio Only Room / Sub Stations
- 1 IS-IPC

Connect directly to a network

Network / Phone Interface Control Unit

IS-IPC
Network / Phone Interface Unit

- Brings all stations connected to an IS-CCU or IS-RCU onto a network
- Allows IS Series to interface with PBX systems
- 1 IS-IPC per IS-CCU or IS-RCU (up to 8 IS-IPCs per system)

IP Addressable

Connect stations directly to a network

IP Direct Stations

IS-IPDV
IP Direct Door Station

- PTZ camera
- Aluminum die cast
- PoE - 802.3af or use PS-2420UL* (sold separately)
- Surface mount
- Use optional IS-MB* for mullion mounting

IP Addressable

IS-IPDVF
IP Direct Door Station

- PTZ camera
- Stainless steel
- PoE - 802.3af or use PS-2420UL* (sold separately)
- Flush mount
- Mounting box included
- Use optional SBX-ISDVF* for surface mounting

IP Addressable

IS-IPMV
IP Direct Audio + Video Master Station

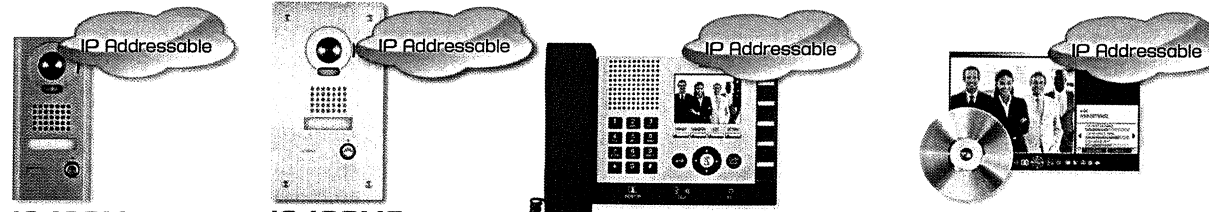

- 3.5" LCD display
- Handset or hands-free
- Door release
- PoE - 802.3af or use PS-2420UL* (sold separately)
- Desk stand included (also wall mountable)

IP Addressable

IS-SOFT
PC Master Station Software

- Virtual master station
- Door release
- Records video to computer
- One IS-SOFT per PC
- Compatible with Windows® XP, Windows Vista®, Windows® 7, or Windows® 8

IP Addressable

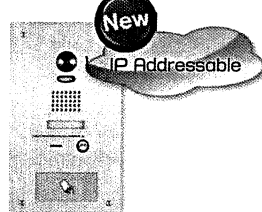

IS-IPDVF-HID
IP Direct Card Access Door Station

- Same features as IS-IPDVF
- Embedded HID® ProxPoint® Plus Card Reader

New

IP Addressable

Connect stations directly to a network

IP Direct Box Sets

ISS-IPMDV
Box Set

- Includes: [1] IS-IPDV, [1] IS-IPMV

IP Addressable

ISS-IPMDF
Box Set

- Includes: [1] IS-IPDVF, [1] IS-IPMV

IP Addressable

ISS-IPSWDV
Box Set

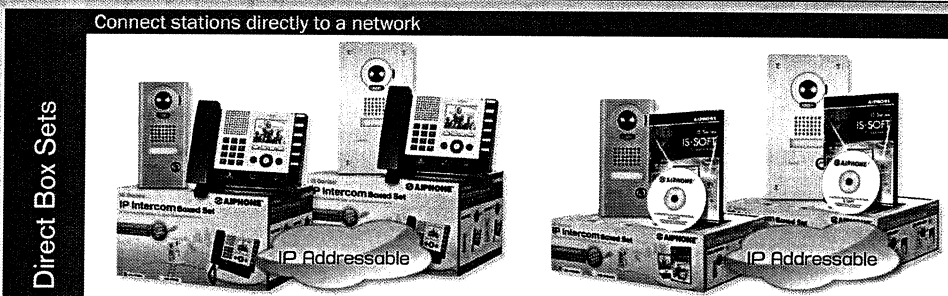

- Includes: [1] IS-IPDV, [1] IS-SOFT

IP Addressable

ISS-IPSWDF
Box Set

- Includes: [1] IS-IPDVF, [1] IS-SOFT

IP Addressable

Accessories

IS-PU-UL
Power Supply

- 48V DC, 2A - UL Listed
- Required for every one IS-CCU, IS-SCU, IS-RCU, or IS-IPC
- Use IS-RACK* to rack mount IS-PU-UL (For up to 3 power supplies)

IS-HTR
Heater Plate

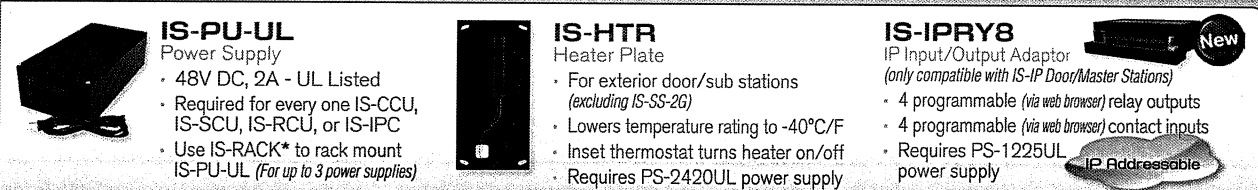

- For exterior door/sub stations (excluding IS-SS-2G)
- Lowers temperature rating to -40°C/F
- Inset thermostat turns heater on/off
- Requires PS-2420UL power supply

IS-IPRY8
IP Input/Output Adaptor (only compatible with IS-IP Door/Master Stations)

- 4 programmable (via web browser) relay outputs
- 4 programmable (via web browser) contact inputs
- Inset thermostat turns heater on/off
- Requires PS-1225UL power supply

New

IP Addressable

IS Series IP Security Intercom

Specifications

Power Source	IS-CCU / IS-SCU / IS-RCU / IS-IPC: 48V DC - Use IS-PU-UL IS-IPDV / IS-IPDVF / IS-IPDVF-HID / IS-IPMV: 24V DC - Use PS-2420UL or Power Over Ethernet (802.3af)
Network Interface	10 BASE-T / 100 BASE-TX Ethernet
Hardware Protocols	TCP, UDP, IGMP (Multicast), IPv4, IPv6
Bandwidth	320Kbps to 8Mbps
Software	Processor 2GHz or faster, 1GB of RAM, Windows* XP, Windows Vista*, Windows* 7, Windows* 8
Connections	RJ-45 (10/100Mbit Ethernet)
Calling	Chime, image, and audio approx. 45 sec.
Communication	AUTOMATIC (hands-free): to activate, momentarily push TALK button MANUAL (push-to-talk / release-to-listen): to activate, push TALK button for at least 1 sec. or until talk LED turns on / a beep sounds
Video Monitor	3-1/2" direct-view TFT color LCD
Min. Illumination	5 Lux at 1' distance
Night Viewing	Up to 1' from camera, with white LED projected
IP Relay	IS-IPRY8 - Contact rating: 30V AC, 500mA
Door Release	Contact rating: 24V AC/DC, 500mA - Use RY-24L for larger contact rating (requires 24V DC power supply)
Wiring	CAT-5e / 6
Distances	Variable - Refer to IS Series Wiring Distances chart—>

IS Series Wiring Distances	CAT-5e / 6 wire
All stations on p. 6 to IS-CCU / IS-SCU / IS-RCU	980'
IS-MV to IS-CCU / IS-SCU	980'
IS-RS to IS-CCU / IS-SCU / IS-RCU	490'
IS-SCU to IS-CCU using 3 CAT-5e / 6 cables	650'
IS-RCU to IS-CCU using 2 CAT-5e / 6 cables	650'
IS-IPC to IS-CCU using 3 CAT-5e / 6 cables	33'
IS-IPC to IS-RCU using 2 CAT-5e / 6 cables	33'
IS-IPC to network node	330'

JM Series

Touchscreen Intercom

JM Series *Touchscreen Intercom*

A Perfect Solution!

The JM Series can be installed at 4 doors and connect to 8 inside stations with internal communication between inside stations. Perfect for any application, anywhere.

COMMERCIAL (OFFICES)

Conveniently and safely identify visitors from any inside station. Place multiple stations around the office to ensure every visitor is attended to in a timely manner. The master station can automatically record visitor images onto an SD / SDHC card for future accessibility. Connect the system to CCTV cameras for additional surveillance capabilities.

RESIDENTIAL (SINGLE FAMILY HOMES)

The sleek and modern design of the JM Series master station complements today's homes and lifestyles. In addition, the JM Series comes equipped with three alarm inputs. These can be used to alert residents of potential threats, emergencies, or home damage.

SCHOOLS

Lock school entrances to maintain security by identifying visitors and unlocking doors safely and conveniently from the main office or principal's desk.

HOSPITALITY

For hotels, hospitals, senior living facilities, or any location that restricts building access during the night or day, the JM Series provides a convenient way to unlock the door for guests or authorized visitors.

RETAIL & DINING

Keep delivery or alley entrances locked while being able to easily identify visitors. See who is on the other side of the door from inside the establishment and conveniently unlock doors from any inside station.

7" Touchscreen

Touchscreen Simplicity!

The 7" touchscreen displays clear images from the door station. Know exactly who is at the door, even from across the room. The touchscreen interface replaces the traditional button design for easy operation and simplicity.

Flexible communication – all-in-one device!

Hands-free (One Touch)

Simply touch the screen and easily communicate with visitors using the built-in microphone and speaker.

Applications: Offices, Homes

Handset

Need privacy? Just pick up the handset at any time during conversation. It is perfect for high-volume environments!

Applications: Healthcare, Schools

Upgrading is a snap!

Door stations connect to the JM Series master station (JM-4MED) using standard 2-wire cable. Use existing wiring, including doorbell wire, to upgrade to a JM Series system. Once doors are connected to the master station, all sub master stations are connected using CAT-5e/6.

Inside Stations (Master & Sub Master Stations)

Use the JM Series touchscreen to easily navigate between functions.

Oversized buttons and intuitive icons allow for quick navigation and control of JM Series functions such as door release and station monitoring.

Sophisticated design.

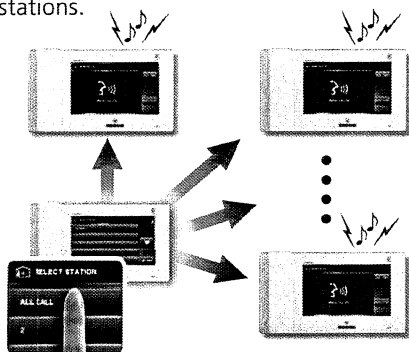

Conventional push buttons have been replaced with touchscreen graphics to create a simple and modern station design.

Internal Communication

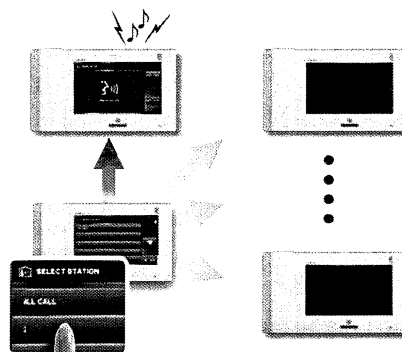

All Call

Simultaneously make an announcement to all inside stations.

Selective Call

Choose a single inside station to call.

AIPHONE JM-4MED

STATUS

Actual size. Screen image simulated.

Zoom in for detail.

The JM Series inside stations control the door station's wide angle camera to observe more activity behind the door. In addition, digital PanTilt and Zoom can focus on an area for greater detail.

Record images to an SD* or SDHC* card!

The JM-4MED features picture memory to record visitors. See who stopped by, when away from the building. Picture memory records images of visitors to internal memory. Insert an SD/SDHC card* to increase the picture memory frame rate. Easily remove the card to view images on a computer or other SD/SDHC display device.

**SD and SDHC cards sold separately*

After a call is placed, the JM Series records 6 images per call to internal memory.

If an SD / SDHC card* is set as the primary storage location, recording frequency increases to 4 images per second for up to 10 seconds per call.

Door Stations

Get the Whole Picture with 170° Video Camera Door Stations

Easily identify all visitors, regardless of height, with the door station wide angle camera.

Using a 170° wide angle and 100° vertical angle camera minimizes blind spots, ensuring a clear view of the door station area.

See images clearly day and night

The JM Series is equipped with an advanced light adjustment feature to compensate for varying light levels. If the image is too dark, use the ADJUST feature to increase brightness at the door station.

Before adjustment After adjustment

Day time with strong backlight

In situations where a strong backlight prevents the user from properly identifying their visitor, a simple adjustment using the touchscreen interface can correct and brighten the visitor's image.

Before adjustment After adjustment

Night time with low light

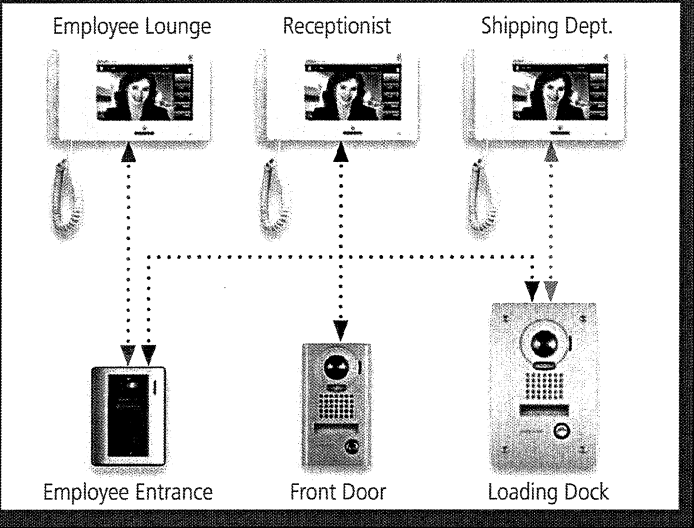

During low light situations, the door station LEDs can be turned on to illuminate the visitor or to more clearly monitor activities taking place around the door station.

Partitioning for a secure building.

The JM Series allows for system partitioning to control interaction and authority between stations. Easily designate a certain master station to only communicate and unlock a particular door or set of doors. In addition, the system calling zones can be created between master stations for quick communication channels.

Partitioning is password protected at each master station to guarantee unauthorized users do not intentionally or accidentally compromise building safety.

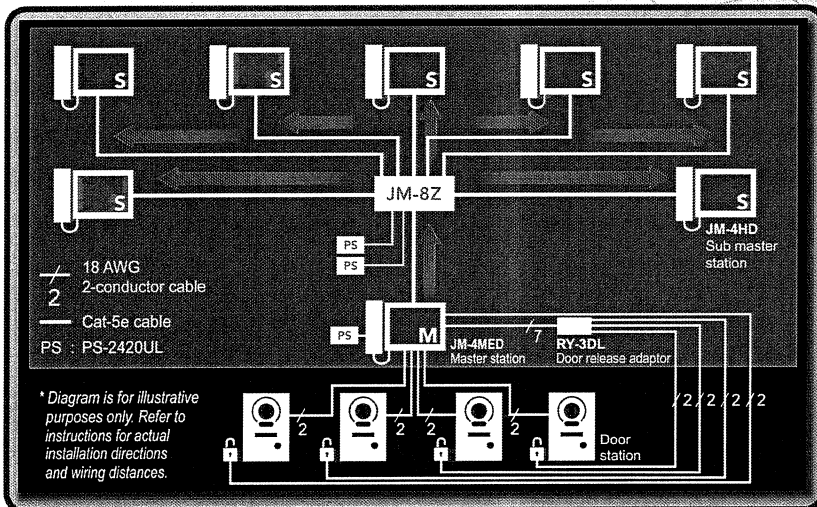

Door station variety.

Using JK Series door stations, there is a door station to suit any application. Integrated access keypads and HID® readers help maintain building safety while continually providing easy access for staff and regular visitors.

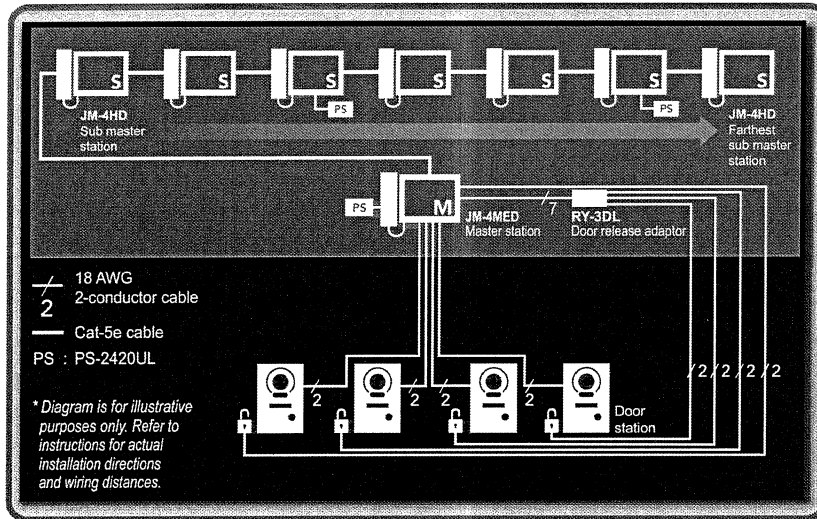

Flexible Wiring Configurations

The JM Series can accommodate up to 4 Door Stations and 8 Inside Stations in a single system. Flexible wiring configuration fits a variety of application needs. The units are connected using CAT-5e/6 cable, allowing for easy installation into new or retrofit applications.

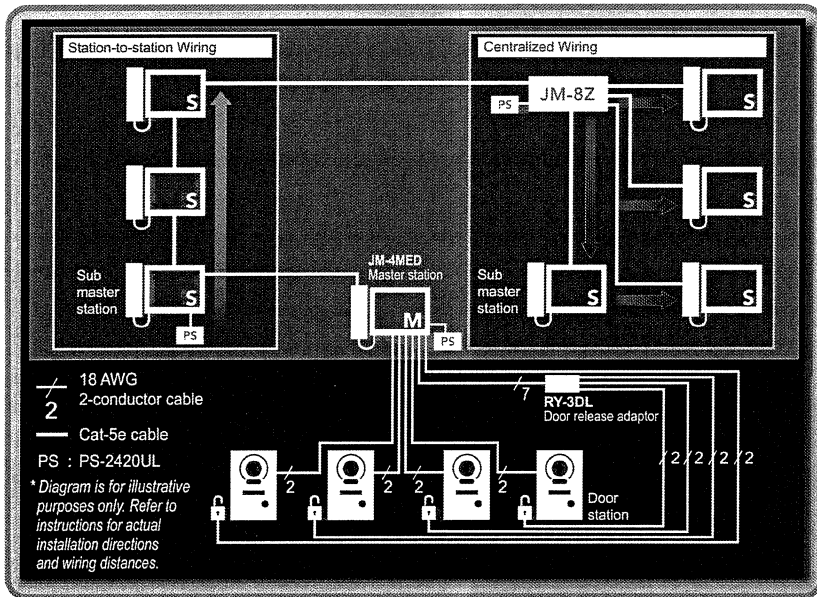

HOMERUN WIRING (Centralized)

Most buildings today are designed using CAT-5e/6 wire or are being upgraded to accommodate the demands of business professionals. Take advantage of this common wiring method used in other applications such as access control systems or CCTV systems. Connect master stations to a central wiring adaptor to save on installation times.

DAISY-CHAINED WIRING (Station-to-Station)

Directly connect a master station to a sub master station and continue linking stations until the project is completed. This wiring style is also perfect for projects where maximum distance is a concern. Station-to-station wiring was commonly used with older style intercom systems. Now, easily replace or upgrade previously installed systems by using this commonly found wiring technique.

COMBINED WIRING

The JM Series also can accommodate a blended wiring style to meet the unique requirements of a particular building. Connect a system using both station-to-station and centralized wiring where needed.

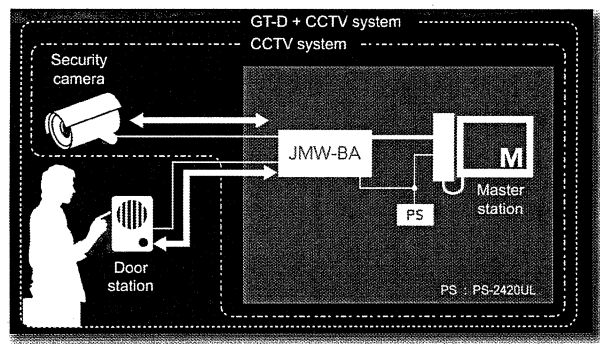

Simple CAT-5e/6 Wiring

Save money!! Install the JM Series using today's most readily available wire. Choose from a variety of wiring methods to accommodate different building requirements.

Use a CCTV camera with an Audio Door Station

See the surrounding area by connecting a security camera using the JMW-BA adaptor. Connect a GT-D to the JMW-BA for two way communication.

Additional JM Series Features

Convenience and Security at Your Fingertips

Three Alarm Inputs

Connect up to 3 sensors to the master station. When a sensor is triggered, all inside stations send out an alarm notification. Sensors can include door/window contacts, water sensors, and Personal Emergency Response System (PERS) devices.

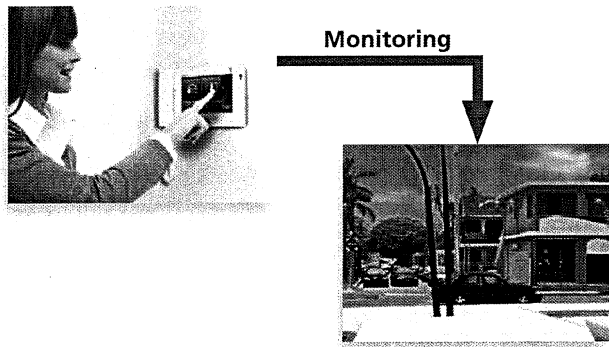

Call Extension and External Relay

Using the RY-ES, door station call-ins can be heard throughout the building using bell systems. Optionally use a call extension speaker (IER-2) to alert occupants in remote parts of the building that someone is at the door.

Video + Audio Monitoring

Inside stations can be set to monitor door stations with video and audio. Inside stations can also audibly monitor other inside stations.

Multi-Lingual Support

The JM Series interface supports the following 9 languages:

- English
- French
- Spanish
- German
- Dutch
- Italian
- Norwegian
- Chinese (Traditional)
- Chinese (Simplified)

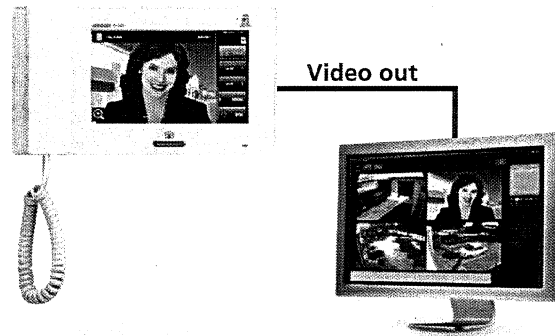

Secondary Output Control

The JM Series does more than just open doors. An additional output is included to control secondary devices like gates and exterior lights, for added convenience.

Video Out

The JM-4MED features a video out via a supplied connector to send video and images to a DVR or to view them on a security video display.

JM Series Components

Start with a box set....

Begin by selecting a JM Series Box Set. Additional components below can be installed to expand features and functionality. Each set contains (1) JM-4MED master station, (1) door station, and (1) PS-2420UL power supply. Just add wire!

JMS-4AED Box Set	JMS-4AEDV Box Set	JMS-4AEDF Box Set
<p>Includes:</p> <ul style="list-style-type: none"> • Door Station JK-DA: PTZ video door station, plastic, surface mount W: 3-7/8" H: 5-1/8" D: 1-1/8" • Master Station JM-4MED: Touchscreen video intercom master station W: 10-1/16" H: 5-11/16" D: 1-7/8" • Power Supply PS-2420UL: Power supply 	<p>Includes:</p> <ul style="list-style-type: none"> • Door Station JK-DV: PTZ video door station, zinc die cast, surface mount W: 3-7/8" H: 6-13/16" D: 1-1/8" • Master Station JM-4MED: Touchscreen video intercom master station W: 10-1/16" H: 5-11/16" D: 1-7/8" • Power Supply PS-2420UL: Power supply 	<p>Includes:</p> <ul style="list-style-type: none"> • Door Station JK-DVF: PTZ video door station, stainless steel, flush mount W: 5-5/16" H: 8-1/4" D: 1-7/8" • Master Station JM-4MED: Touchscreen video intercom master station W: 10-1/16" H: 5-11/16" D: 1-7/8" • Power Supply PS-2420UL: Power supply

91270 JM Brochure 11/2012

Recorded

- Intuitive access to recorded video from any camera in system regardless of location
- Frame-by-Frame or variable playback speeds up to 16X
- View single camera or drag and drop up to 16 cameras for Synchronized Playback
- View groups of cameras via drag and drop
- Slider bar provides quick access to events
- Digital zoom on all recorded video
- Save JPEG or print snapshots
- Synchronized video and audio
- Instant replay of last 30 seconds of recorded video
- Create a clip with use of guides marking time interval
- Save clip to local client or server
- Continuous, motion activated, scheduled, event or trigger based recording
- Record up to 30 FPS or as little as 1 image per second, hour or day
- Record always at 1 FPS and higher frame rate on motion or alarm
- Pre- and Post-motion recording
- Support for camera and server side motion detection
- Create sensitivity zones in Windows client or camera configuration
- Motion Event logs provide quick review of video associated with motion or alarm events
- View recorded video from archived servers
- Graphical timeline highlights motion events
- Smart Search
- Progressive download speeds for slow-speed connection
- Automatically manages files and disk space
- Specify maximum retention by camera
- Panoramic/360 De-warped support
- View full aspect ratio of 16:9 or 4:3

Video Export

- Save JPEG or print snapshots
- Clips include visible watermark, server based date/time stamp and camera name
- Option to include MD5 checksum watermark in each clip, use Standalone Player to validate
- Recorded video is saved in cameras native or MJPEG compression in AVI file
- Exported clips include audio
- Synchronized video export of up to 9 video streams in single AVI file
- Standalone Player with Watermark Validation – Review recorded video on any PC while viewing thumbnails and using a scroll bar for precise investigation - includes option to validate a watermark

Live Video

- Full-featured Windows, Web, and Mobile Clients
- iPhone and iPad app available for free on iTunes - Android App scheduled for Fall 2012
- Mobile App supports live and recorded video from any camera, control of PTZs and email images
- Web Client supports IE, Safari, FireFox, Opera and Chrome - Active X is optional
- Macintosh support via Web Client
- Support for other smartphone devices including Blackberry and Windows Phones
- Client applications require little or no end user training
- View live video from any camera across multiple servers
- Quickly navigate between cameras from any server using standard Windows Explorer tree structure
- Unlimited users can view live video
- Digital Zoom on any image with mouse click
- Picture-in-Picture of zoomed area
- Create customized layouts and layout groups

- Drag cameras from left navigation tree into layout
- Predefined layouts stored in the database can pull cameras from multiple servers, restricted by security level
- Camera touring or Layout sequencing
- View full aspect ratio of 16:9 or 4:3
- 180° stitched layouts
- Single, Quad and Panorama views for 360 cameras
- Three PTZ control options including on-screen overlay commands, left navigation control and pop-up menu options
- Cycle PTZ presets, pausing for specified interval
- PTZ control with USB Joysticks
- Option to lock down non-admin users from PTZ controls
- PTZ Prioritization – Users can be ranked to determine who has PTZ operations at a specific time
- Search box allows quick access to any camera or server - search by partial name or IP address
- Save JPEG or print snapshots
- Push live video pop-up windows to other logged in users
- 2Way audio allows operators to interact with video
- Create Covert cameras by removing from navigation
- Pause individual camera for instant investigation
- High Performance option renders video in real time
- Run in Full Screen mode with limited menus
- Connect up to four monitors per PC
- Video Wall app supports up to 64 monitors
- Operators can push video to a Video Wall, cycle layouts or view alarms
- Motion alerts displayed for each camera
- Option to play sound on motion alarm
- Launch clients in full screen mode to predefined layouts
- Panoramic/360 De-warped support
- Public View App displays live images directly from camera without connecting to a server
- Lane Viewer App displays live images along with card holder picture and information to verify identity

Facility Maps

- Multi-level mapping provides quick access to cameras
- Mouse over Camera icons for live video pop-up
- Zoom into maps or navigate between multiple layers
- Quick access to recorded video from facility maps
- Launch specified facility map on startup
- View maps from Windows or Web Clients
- Mouse over Layout icons to switch live displays to groups of cameras in the area
- Easy setup requires JPEG, BMP or GIF images and drag and drop camera placement of maps, cameras, layouts or doors

Notifications & Automation

- Pop-up live windows of alarmed cameras
- Red outline in camera layout on alarm conditions
- Play audio file on alarm to alert operator
- Pop-up window with detailed instructions for operator
- Alarm actions include changing displays, execute DIO commands, display instant replay, push image to video wall, cycle spot monitor, move PTZ to presets, change recording options and record with audio
- Email or send text message of JPEG or AVI clip
- Alerts can be directed to specific users or groups
- Powerful Rules Wizard allows easy configuration of an unlimited number of automation tasks that allow the system to take actions after an event
- Motion alerts displayed for each camera
- Option to play a sound on motion alarm

- Send JPEG snapshots on an interval or on motion
- Alter operators of camera side Analytic events
- Using Analytic Tripwire, count people entering and exiting facility to keep running total and alert if threshold exceeded

Enterprise Functionality

- Support for unlimited cameras and recording servers
- Distributed login to any server prevents single point of failure
- Support for both centralized and distributed architectures
- Use existing SQL Server infrastructures or included SQL Express
- Centralized Management – all camera configurations for all servers are done from one easy to use setup screen
- Authenticate users with a Video Insight users database or with integration of users and groups from Active Directory, LDAP or Novell eDirectory
- Assign individual camera permissions to users or groups
- All system and user settings are stored in SQL database
- Centralized storage of user layouts and centrally managed
- Automatic Failover
- Health Monitor – comprehensive monitoring and alerting of system status
- Audit Trail of all user logins and configuration changes stored in a SQL database
- Automatic upgrade of client applications
- Automatic system backup
- Complete system performance statistics including - Storage, Bandwidth, Resolution, Format and Frame Rate
- Users only see assigned cameras regardless of number of servers
- Export camera and server information in Excel format
- Camera Maintenance logging and tracking
- .Net-based Software Development Kit

Security

- Enterprise-wide user management
- Multi-level security including restriction of setup, management, live and recorded viewing, PTZ operation, access to layouts, facility maps, rules and clip creation
- Authenticate users with a Video Insight users database or with integration of users and groups from Active Directory, LDAP or Novell eDirectory
- Assign individual camera permissions to users or groups
- Comprehensive log of all changes to system
- Option to restrict users from logging in from multiple locations
- Limit users to a single login per username
- Option for inserting MD5 checksum into all recorded video files to detect any tampering

Camera Support

- Deep integration for *1,800 camera models from 80 manufacturers
*Complete list available at www.video-insight.com
- Universal camera driver provides support for almost all other cameras via ONVIF, RTSP or HTTP
- Advanced camera features from Axis, Panasonic, IQeye, Sony, Sentry 360, Scallop and Immervision
- Single, Quad and Panorama views for 360 cameras
- Resolutions up to 20 Megapixel
- MJPEG, MPEG4, H.264 Compressions
- Multicasting support
- Multistreaming
- Camera or server side motion detection
- Support sensitivity and privacy zones
- Camera auto discovery
- Centralized camera management
- Audio inputs and outputs
- Combine audio and video from two independent sources
- Send live video to Axis Decoders
- Trigger Digital Inputs and Outputs

Technology

- Robust scalable design
- Developed in open technologies including Microsoft .Net and SQL Server
- OS Compatibility 32 and 64-bit versions of Windows XP, 7, 2003, and 2008 R2
- Virtualization support for VMware, Hyper-V and Xen
- Automated failover support
- Access live and recorded video or control the server with .NET SDK
- Easy integration with 3rd party application via the well defined SQL tables
- Server Software runs as a Windows Service
- Clients can connect to a single IP address to access the entire system
- Servers are connected to cameras and clients are connected to the servers - Clients do not connect directly to cameras
- Email support for SSL and alternate ports, supporting Gmail and Hotmail
- SSL certificates for secure web client transmissions
- Execute programs or batch files on triggered event

Storage

- Flexible high-speed storage design with no limits
- Support for internal and external storage devices including NAS, SAN and iSCSI
- Support for Pivot3 Cloudbank failover architecture and Dell EqualLogic iSCSI
- Integrator support for Veracity Coldstore
- Intransa Virtual and iSCSI solutions
- Long Term Storage for recorded video file management
- Move recorded video from single or multiple cameras or servers on a schedule basis
- Option to restrict users from logging in from multiple locations

Performance

- 250 two megapixel cameras per operating system
- Deep camera integration technology and storage architecture allow extreme server performance
- Total camera bandwidth of 600 Mbits/sec
- Unrestricted number of clients
- Load balancing
- High Performance live display mode can show up to 36 megapixel images at 30 FPS

Licensing

- Simple per camera licensing available in single camera increments
- No base or server fees
- Individual camera MAC address registration is not required
- No extra licensing costs for client applications
- Virtual cameras require only a single license
- Multi-stream connections only require one license
- Arecont 180° and 360° cameras require only a single license

Support Options

- Lifetime technical support Monday through Saturday
- Unlimited software updates
- Remote control applications for unattended access

Access Control Integration

- S2
- Lenel
- IMRON
- RS2
- DSX
- Blackboard

Enterprise Video Management Software

— VIDEOINSIGHT —

Easy. Powerful. Affordable

Many Video Management Software products on the market today have been designed with unnecessary complexity and a bloated infrastructure – and cost way too much to own! Video Insight is an affordable, easy-to-use, and feature-rich Video Management Software(VMS) that allows SMBs and enterprise businesses alike the ability to access live and recorded video from any camera on any server via the Monitor Station, a Web Client or Mobile Apps. The solution provides customers the ability to use existing cameras and infrastructure in a centralized or decentralized deployment resulting in a significant savings.

Video Insight software is currently used by over 25,000 customers across numerous sectors including financial, government, retail and transportation – and has a very strong presence in the education market with more than 4,500 school and college campus customers.

Why Choose Video Insight?

- Easy to Use – requires almost no training
- Powerful enterprise class features designed for multi-facility use
- Mobile, Web and Windows Clients
- Multi-layered facility maps with live video and alarm pop-ups
- Supports unlimited cameras and locations
- Support for centralized or decentralized configurations
- Easy camera integration supporting over 1,800 camera models from 80 manufacturers
- Open platform with powerful SDK
- High performing — supports 250 cameras per OS
- Active Directory and LDAP Integration
- Automated Failover
- Supported by a world-class, U.S.-based technical support team

“Had we known that the digital solution was affordable and so easy to use – with such sharp imagery – we would have made the transition a long time ago rather than spending so much time and money on outdated technology.”

- John Croke, Card Systems/CCTV Analyst
Providence College

**Currently used by more
than 25,000 users worldwide**

Surveillance From Anywhere

Video Insight surveillance software allows you to access live and recorded video no matter where you are. The Monitor Station, Web Client and ViMobile App share powerful VMS features designed to work in an enterprise level, multi-facility environment or a small-scale deployment.

Monitor Station

The Monitor Station is a powerful, full-featured, easy-to-use client that allows users to view live and recorded video from any camera on any server.

Using the Monitor Station, administrators can configure all server and cameras from a centralized console. Great for users who need powerful features like dispatch.

Key Benefits

- Powerful features
- Quick view live and recorded video from any camera
- Intuitive, easy-to-use design
- View up to 250 cameras per OS
- Bandwidth Options
- Control remote Video Walls
- Centralized administration
- Alarm monitoring

Web Client

The Web Client allows you to view live or recorded video from anywhere using Internet Explorer, Firefox, Chrome, or Safari without a plug-in.

The fully functional Web Client allows users to search recordings via a timeline, control PTZ, take snapshots, download clips, view up to 36 cameras in a layout, and use facility maps with live pop-up windows.

Key Benefits

- Easy to use
- Supports all browsers
- Live pop-ups in facility maps
- View cameras from multiple servers in the same layout
- Zoom into live and recorded video
- Graphical timeline
- Support for SSL transmission

ViMobile App

ViMobile allows "on the go" users access to live and recorded video from any camera on any server. View camera layouts, facility maps, email snapshots, and control user access with active directory authentication.

ViMobile is available for iPhone or iPad via a free iTunes download and will be available in the Android Market Store.

Key Benefits

- Live and recorded video from any server
- Layouts can pull cameras from multiple servers
- View cameras in low or full resolution
- AD and LDAP user authentication
- Facility map

Powerful Enterprise Feature Set

Don't let the price and the easy-to-use format fool you! Video Insight provides the most robust VMS features and accessories on the market. Optimized for enterprise, multi-facility configurations, Video Insight is also the right choice for small video surveillance deployments.

Video Wall

When viewing a large number of cameras from a central dispatch, it's helpful to have multiple large monitors allowing everyone to view the same images. The Video Insight Video Wall application will automatically display a group of cameras, distributed over multiple monitors, allowing operators to interact by changing the layout and pushing cameras to specific monitors.

Public View

One of the challenges of deploying IP video cameras is displaying the live image in a public setting. Public View from Video Insight easily solves that problem. Public View is a standalone application that automatically starts and can display up to 36 images on a single monitor.

Health Monitor

Health Monitor provides immediate notification of issues affecting the Video Insight server. The Health Monitor receives status updates from each Video Insight server and cameras and sends email alerts if status is not received within the designated limits or exceeds predefined thresholds.

Storage

When the storage requirement exceeds the server capacity one way to address storage issues is by using the Video Insight Long Term Storage application.

- Features:
- Standalone application that pulls video from the Video Insight Server
 - Create multiple schedules
 - Select cameras
 - Select time frame
 - Transcoding of MJPEG images to Microsoft WM

Centralization

A centralized VMS deployment includes the ability to virtualize, reduce capital investment, reduce maintenance costs, provide a robust redundancy, and leverage your existing technology infrastructure.

AD/LDAP Integration

Using an AD/LDAP integration provides the users a common authentication to the Video Insight Software Suite. This also provides additional security benefits such as password policies and password expiration.

Analytics / Search

Provides customers with the ability to smart search – highlight area and search for motion, timeline as well as analytics integration supporting direction, stopping, dwell filter, enter and exit filters, appear and disappear filters, speed filter, tailgating, abandoned object, object counting, camera attack, tamper detection and more.

“We recommend Video Insight software for all of our projects – among them schools, businesses and petrochemical plants. It works with nearly any camera model an enduser has or wants and it is a reliable and feature-rich product.”

- Mark Kleinsteuber, Vice President
Klein Security & Safety

IP Server

The Server is the hub of the Video Insight IP software product — communicating directly with cameras by requesting images, forwarding images to clients, and saving them for review. Video Insight runs on all Windows Operating Systems as a service with the Server App configured as a standalone server supporting up to 250 cameras or as part of a group of servers supporting an unlimited number of cameras.

Key Benefits

- Scalable
- Efficient 64-bit design
- Designed for large camera deployments – multi-server, multi-location
- .Net
- SQL Server based
- Support for all OS
- Supports camera- and server-side motion detection
- Supports advanced camera features
- Automated failover
- Integrates with Active Directory

Storage

- Support for local, direct attached SAN / NAS
- iSCSI
- Pivot 3
- Dell EqualLogic and Dell Compellent
- Veracity Coldstore
- D-Link

Wide Camera Support

- Video Insight provides easy integration to over 1,800 camera models from 80 manufacturers. Features include maximum resolution, digital input and output, PTZ control, two-way audio, motion detection and other specialized features.

Access Control Partners

Video Insight surveillance software integrates with leading Access Control providers to bring endusers the key strengths of both systems: video surveillance coupled with the ability to limit and monitor access to buildings and areas within buildings.

Storage Partners

Partnering with leading storage providers gives Video Insight customers options for system expansion and backup – resulting in lower costs, better performance and eliminating the risk of lost video.

The Most Cost-Effective Path to IP

The VP Series Encoders from Video Insight provide the most affordable, yet simple, solution to centralize and scale your video surveillance system. Migrating to IP video from analog using video encoders sets the foundation for a video management system where you can easily add existing and new cameras – analog or IP – to your network.

Benefits of the VP Series Encoders:

- Up to 16 inputs
- Capture at D1 Resolution
- Up to 30 FPS
- H.264 compression
- De-interlaced Images
- Dual stream
- Onboard motion detection
- 1Gb Network port
- Do not require Video Insight licenses
- No Software maintenance Fees
- Digital inputs and outputs
- Audio
- PTZ Control via RS485
- ONVIF Compliant
- 3 Year Warranty

Some of Our Customers

Integrators

One of the most important partnerships in providing an effective video management system is the one between Video Insight and our systems integrators. Integrators recommend our product to their clients because they know the Video Insight VMS is feature rich, user friendly, affordable and most of all – reliable. They also know that our U.S.-based technical support team – which operates on a one-hour call back guarantee – will always be there.

Key benefits for Integrator Partners include:

- Substantial discounts
- Shared recurring revenue opportunities
- Marketing & trade show assistance
- RFP assistance
- Leads & more
- Product training, unlimited webinars and sales engineer support
- Dedicated salespeople
- Credit (based on approval)

When you become a Video Insight Integrator Partner, we provide you a superior VMS product, and our support doesn't stop there. We highlight our partnerships in a variety of ways—via case studies and articles placed in industry trade publications, on our website, and throughout social media.

Problem Addressing Costly and Frequent Equipment Updates to an Existing Analog System

Located in Providence, RI- one of America's first cities- and rich with history, culture and tradition, Providence College is a 100-year-old institution with approximately 4,000 students. Although its academic offerings are superior, its outdated analog video surveillance system, charged with monitoring 50 campus buildings, was becoming a costly burden.

"Basically we were throwing good money after bad," said Providence College Card System/CCTV Analyst John Croke.

"We didn't want to continue investing in the older analog technology," he said. "We were spending a great deal of money to get analog cameras running on our DVRs."

Making the upgrade to campus-wide fiber optic cabling gave Providence College the opportunity to transition from its existing analog video surveillance technology to a far superior IP video surveillance solution operating on Video Insight IP software.

Through its relationship with systems integrator J&B Communications, Providence College had access control installed to secure entrances and rooms on campus. After approaching J&B with the task of procuring a solid video surveillance solution, J&B recommended Video Insight.

"Put simply, Video Insight is an excellent product that is easy to use, affordable and is far superior to anything that is available in video surveillance."

- Robert O'Connor,
J&B Communications President

THE SOLUTION

Video Surveillance Overhaul: From Analog to IP

The best college in the city voted "the best city to live in" now has the best in video surveillance – an IP system from Video Insight. Updated monthly with major upgrades released annually, Video Insight offers end users tailored solutions by offering direct access to developers who can provide a solution for practically any surveillance scenario. "Put simply, Video Insight is an excellent product that is easy to use, affordable and is far superior to anything that is available in video surveillance," said J&B Communications President Robert O'Connor.

"It fits so well into the suite of services we provide as an integrator." The Providence College solution using Video Insight brought them into the "new age of video surveillance," said O'Connor. J&B Communications converted 100 existing analog cameras to digital through the use of H.264 Video Encoders and installed nearly 50 new Axis digital cameras. The cameras are installed in many of the college campus security mainstays including hallways, parking lots and on-campus security telephones.

Operating on two Windows-based servers located on the IT mainframe, the new system "provides the ability to access all cameras over the campus network and via the Internet with different levels of security," said O'Connor.

"Our users have been so impressed with the quality of the images as well as the ease of use of the Video Insight system. Our administrators are thrilled!" said Croke. "The digital system is so much easier than analog – especially when we have to look up older footage."

Croke and technology personnel have conducted the training and manage the installation of the cameras and continue to add cameras. "Had we known that the digital solution was affordable and so easy to use – with such sharp imagery – we would have made the transition a long time ago rather than spending so much time and money on an outdated technology," said Croke.

The Problem...

Texas' Capital School District Sought Better Video Management System for 3,000+ Camera System

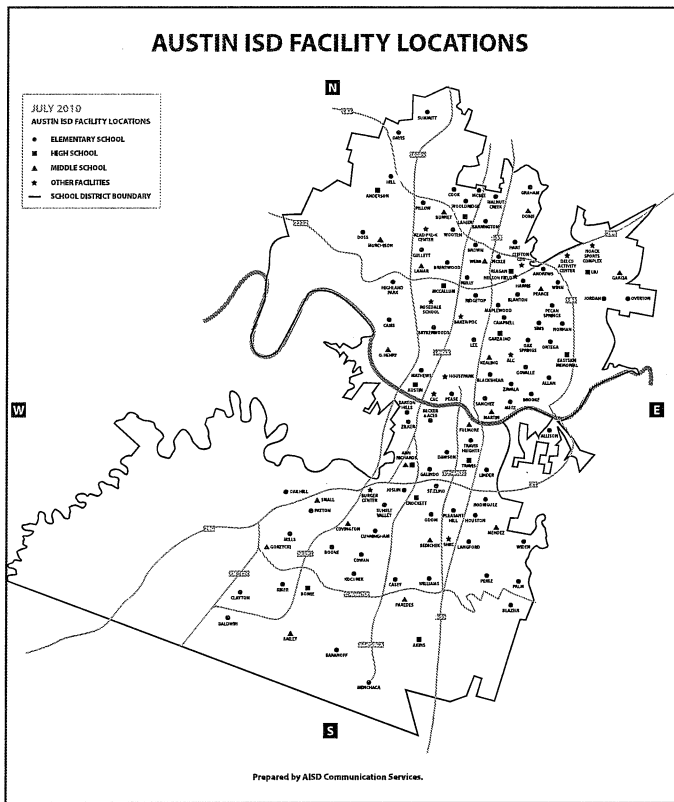

Known for its music scene and for being proud to be “weird,” Austin is more than just the capital city of Texas. It’s also home to the 38th largest school system in the United States. Encompassing 230-square miles, Austin Independent School District has 86,000 students and more than 11,000 employees across 124 campuses.

An organization this large requires a dependable video management system to aide in providing video monitoring of facilities and students, as well as the ability to review incidents in an easy and rapid fashion. Schools districts this large move employees from campus to campus. Which means the VMS administrators spend a considerable amount of time with user maintenance. With this number of users a reliable web client is more economical than installing (and uninstalling) thick VMS clients on each PC, which also overburdens the already taxed VMS administrators.

Austin ISD found, however, that their 3,000 camera, 50-server system came up short in these all-too-important – and many other – areas.

“We were unhappy with the platform that we had and we needed a more practical solution – something that is easy to use,” says Austin ISD Police Department Representative Wayne Russell. “We needed something that didn’t require an incredible amount of CPU processor power and that could also serve as a fully-functioning web-client.”

After an exhaustive bid process, Russell says Video Insight was the only choice: Video Insight was the only software solution that worked seamlessly with the district’s existing cameras from their previous software provider, DVTel. Video Insight also offered what Austin ISD most sought: ease-of-use and a dependable web client.

The Solution...

Video Insight Software With Strong Performing Web Client and LDAP Integration Provides Austin ISD Better Performance, Storage and Image Quality

Video Insight Chief Technical Officer James Whitcomb says that Video Insight’s open architecture, ease of use and features that were developed specifically for large systems with multi-campus and facilities is what made it best-suited for a project like Austin ISD.

“Austin ISD was unhappy with their previous provider and had specific expectations that we were more than able to meet,” says Whitcomb.

How did Video Insight improve the Austin ISD’s existing system?

Training – Austin ISD VMS users made the transition to Video Insight with a simple guide showing the login instructions and how

to navigate. Because Video Insight is so easy to use, the video management team did not require any training sessions, although they have access to numerous technical training videos on the Video Insight Support webpage if they desire to undergo enduser training or seek instruction on a specific topic.

Web Client – Austin ISD users can now access live and recorded video via the Web Client. With the previous system they only used a Thick Client that had to be physically installed on each PC. With the number of users in this size of a district this was an almost full-time job for the VMS administrators.

LDAP Integration – With Video Insight's LDAP user and group integration, Austin ISD created a security group for each campus and assigned camera permissions to these groups. As users move from campus to campus, the video management team only has to move the users from one group to another. Even if a single server supports multiple campuses, the users get permissions to only the cameras assigned to the group. Under the previous system, VMS administrators had to create user names for each video user and assign camera permissions – a time consuming and unnecessary task.

Image Quality – With Video Insight, Austin ISD is able to run all of their cameras at maximum resolution even while using the same hardware. Previously, the cameras had been set at half resolution to improve system performance.

Storage – With Video Insight's efficient storage system, recorded history has doubled across all the servers even considering the image is running at full resolution.

System Performance – With Video Insight's distributed architecture, users login to servers with their cameras and are not routed to a single login server. This has dramatically improved the user experience since previously users had to wait up to 5 minutes to view video after login.

Wide Camera Support – With Video Insight's support for 1,200 different camera models from 70 manufacturers, Austin ISD is able to add new cameras from any manufacturer, which Russell says he is eager to explore.

Russell says they are very satisfied with the Video Insight system. Instead of struggling with problems in their VMS, they can now dependably access cameras and recorded video. The Austin ISD police department dispatch has the ability to monitor cameras 24-hours a day, seven days a week, but the campus administrators are the primary monitors – routinely watching cameras during peak times: bus drop off and pick up, in cafeterias during breakfast and lunch time, on the playgrounds and in the hallways during class changes.

If there is an event, school administrators do not export video – they alert their assigned police officer of the incident and the officer exports the clip and assigns it a case number. Limiting who can export a clip provides an extra layer of security for video that contains images of school children, says Russell. "While we wouldn't expect an employee to export clips for any reason other than to share an incident with the authorities, it's always comforting to have absolute control over video images of the children in our school system."

Whitcomb says the challenging Austin ISD project is a perfect indication of how Video Insight can improve video management – no matter the size.

"As a result of our work together Austin ISD has better system management, better use of storage, no need for in-depth training," says Whitcomb. "The best news is that they have reliable video surveillance that adds to – and does not detract – from a district-wide safety program."

To learn more visit www.video-insight.com

Video-Insight offers intelligent and user-friendly state-of-the-art IP video surveillance systems. Headquartered in Houston, Texas, Video-Insight software is used in thousands of businesses including schools, universities, hospitals, banks, hotels, restaurants, retail businesses, and government facilities. Case Study: Leon County, Florida, Schools

VIDEOINSIGHT

Digital Video Management System

“One of the best features is that authorized personnel can watch the camera from our state-of-the-art monitoring station or remotely, whichever is most convenient for them.”

—Leon County Schools Safety & Security Director John Hunkiar

The Problem?

Large School District Needed Affordable & Effective Surveillance System

Home to Florida’s capital of Tallahassee, Leon County is among the largest public school districts in the state serving 33,000 students at 48 campuses. With dozens of school campuses and virtually no comprehensive video surveillance system, Leon County Schools was seeking an affordable, yet effective, video surveillance system solution when they first approached Video Insight in 2007.

Safety and Security Director John Hunkiar said Leon County Schools sought to ensure that the 48 campus perimeters and administration buildings were safe from unauthorized access and use. They desired to have a full-fledge video surveillance solution, but wanted something simple that they could easily install and maintain.

School Security is the Leon County School’s number one priority, and the progressive district is a national leader in utilizing technology to maintain safe learning environments.

“We did a great deal of research when looking at different video surveillance companies,” said Hunkiar. “We were looking for a company in particular that would strictly deal with the software and didn’t

have to include a lot of hardware as part of the deal. We found that Video Insight offered us everything we were looking for.”

Leon County Schools also sought to incorporate access control to some of their administrative facilities to secure sensitive and confidential data.

The Solution?

Affordable Analog Video Surveillance & Access Systems

Leon County chose an analog system consisting of rack mount Dell 2950 servers and 32 cameras per school campus, yielding more than 1,500 cameras in all. Currently that represents cameras at 24 elementary schools, 8 middle schools, 6 high schools and more than 10 special campuses, and administrative buildings. They also continue to add more cameras as their needs increase and their configuration changes.

The cameras are primarily set to monitor and record building exteriors and parking lots with the prime task of deterring unauthorized campus access and visitors, as well as illegal activity including vandalism, said Hunkiar.

Read on for more of
the Solution.

“One of the best features is that authorized personnel can watch the camera from our state of the art monitoring station or remotely, whichever is most convenient for them” said Hunkiar. “Image storage demands are also adequately met and easily accessed.”

Leon County Schools also chose to implement Video Insight’s card access control system in order to secure confidential information in a few administrative areas. Building Management Systems Coordinator Jim Sciara, has been instrumental in building automation and oversees Leon County Schools’ technical security camera program.

“Access control and security cameras are becoming more commonplace in Florida schools. There are many benefits to these systems when meeting the demands of tiered access levels and providing accountability,” said Sciara.

Since Leon County Schools had just “16 cameras at a couple of sites” on their vast school district, it was a considerable job outfitting 48-plus buildings with the analog system they selected. Both Hunkiar and Sciara agree that Video Insight has surpassed their expectations and has offered professional support as well as increased capability over the last two years.

Pictured is the video surveillance monitoring station at Leon County, Florida, Public Schools.

“We have been very pleased with the products and the service we have received. It’s very easy to use – we do the installation and the maintenance, as well as all of the training,” said Sciara.

“We continue to work with Video Insight adding new equipment on a regular basis and as we grow we plan to continue to utilize their expertise,” said Hunkiar.

The Problem...

Growing Texas School District With 29 Campuses and Counting Needed Comprehensive Video Surveillance System

Pflugerville (pronounced “flew-grr-ville”) Independent School District rests in a popular suburb just northeast of Austin, Texas. Encompassing nearly 100 square miles, PISD enrolls more than 21,000 students on 29 campuses.

Within the next 10 years PISD expects to double its enrollment to reach more than 40,000 students. Recognizing the need to develop a comprehensive video surveillance system to effectively monitor and provide safety for the thousands of students that walk the hallways and enter and exit buildings every school day, PISD sought a district-wide video management system to replace the DVRs and proprietary camera software systems they were using at a few campuses.

“We had a campus-by-campus DVR-based system, and not at every campus, just at a few” said Jo Moss, PISD Safety & Emergency Management Coordinator. “If a camera went down – which was often – we went out to the BuyBoard state-approved vendor list and just bought another one. We found what we had in place to be a temporary fix for what was a more general issue.”

Moss said it was a system that offered little support which seemed to result in continued money invested in equipment, rather than a solution. She and Technology Project Manager Todd Gratehouse then sought to further develop the existing plan and to implement a comprehensive resolution that would provide district-wide coverage – a solution that was in line with the district’s safety initiatives.

A Pflugerville ISD police officer monitors video from an Arecont 360 degree camera in a school cafeteria at John B. Connally High School, Pflugerville ISD.

“Video Insight has been so easy for our campus administrators and police officers to just get into the software and do what they need to do because the user interface is so simple to use.”

— Jo Moss
Pflugerville ISD Safety & Emergency Management Coordinator

The Solution...

2,200 Camera Stream VMS Operating on Video Insight Enterprise Software

After an exhaustive bid process, PISD selected Video Insight’s Enterprise Software to manage the camera district-wide solution. System Integrator Titus Systems, of Round Rock, Texas, provided the physical installation of the cabling and cameras. The implementation includes 600 Axis and 300 Arecont 8MP cameras running on 11 Dell R510 servers each with 22TB of RAID5 storage hosted in the PISD datacenter.

Cameras have been placed in all major hallways; entrances and exits; bus loops; loading docks; cafeterias and gymnasiums. The district chose the extremely reliable

John B. Connally High School, Pflugerville ISD.

Axis cameras for many of its indoor and outdoor locations. The Arecont cameras are a mix of 180 degree and 360 degree 8 megapixel panoramic cameras. The Arecont cameras provide four separate camera streams, but only use one Video Insight license (which saves

the district money). Moss said the Arecont 8MP 360s also make the camera presence less noticeable by students.

“With the Arecont 360 I have four excellent views of the cafeteria, for example, but as far as the students are concerned, they just see one camera. Also, our school board didn’t want to give the impression that PISD had entered a ‘Big Brother’ phase, so the more you can do with fewer cameras satisfies everyone.”

With PISD’s fiber infrastructure, all 2,200 cameras are streamed from the various campuses to the datacenter where the Video Insight Enterprise Software distributes the processing across the Dell R510’s running more than 150 cameras per server, which makes for an efficient use of infrastructure, said Gratehouse. In addition, a 12th R510 is configured for automated failover in the case of a server failure.

“Our purpose in developing this plan was to provide the safest environment for our students and employees, while also maximizing our resources, and we have achieved that,” he said.

Gratehouse added that employees have found the Video Insight software much more “user friendly” than what they had before.

“Our campus administrators and police officers monitor the cameras and at times we have had to make video clips for use in investigations,” he said. “They have had no problems in retrieving video and in using the software. It has been so easy for them to just get into the software and do what they need to do because the user interface is so simple to use.”

Moss said PISD is building for growth with two new elementary schools, a middle school and a high school coming on board in the next five years. The district plans to have cameras using Video Insight for these campuses, as well.

The district is pleased overall with the implementation, particularly since the comprehensive coverage Video Insight provides supports the district-wide safety plan.

“Video Insight ensures consistent coverage throughout our district,” said Moss. “We know that we have the doors, cafeterias, gyms and hallways of all schools covered. That consistency is key to the implementation of our district-wide safety program. All campuses have the ability to monitor and provide a safe environment for our students and employees.”

Raptor Visitor Management

Nation's Leading K-12 Visitor Management Software

 raptor

Customers Nationwide

Raptor leads the nation in visitor management software for K-12 schools and protects over 9,500 schools across the country.

The Raptor Difference

- **Raptor** serves more K-12 schools than any other visitor management system in the U.S.
- Raptor provides **full feature functionality** across four tracking modules: visitors, students, faculty, and volunteers.
- Raptor is the only visitor management provider that provides **live offender alert monitoring**.
- Raptor's **Customer Support** department is unmatched by any K-12 visitor management provider.
- Raptor provides an **emergency alert button**, a silent alarm, that can send emergency communications to a customized list of recipients.

raptor

Comprehensive Database

- Since inception, the Raptor System has identified over 11,000 registered sex offenders attempting to enter our client's schools.
- Raptor maintains the most comprehensive registered sex offender database of any visitor management provider and provides weekly updates.

Offender Alert Monitoring

- Raptor is the only visitor management provider that actively monitors all client's possible sex offender alerts in real time.
- The Raptor staff can provide feedback to front desk and security personnel on suspicious alerts.
- Raptor's trained staff monitors more than 7,000 possible offender alerts per month.

Feature-Rich Volunteer Module

- Raptor's Volunteer Module allows schools, districts, and volunteer coordinators to easily manage, communicate with, and track all of their volunteers.
- Every volunteer receives an instant sex offender background check each time they are logged into the Raptor system.
- Raptor's Volunteer Module integrates seamlessly with your district's volunteer and approval process.
- Reporting includes:
 - Volunteer hours
 - Volunteer event summaries
 - Volunteer custom fields and custom histories
 - And much more...

Schools to check for sex offenders as visitors get quick background search

Posted: 12:05 am

Starting this month, parents and community members visiting most Rio Rancho schools must present an identification and undergo a quick background check.

Michael Baker, director of Rio Rancho Public Schools security department, said he hopes to have the Raptor system installed at every school, except Cyber Academy and Independence High, by the end of this month. Baker said those schools are small and don't need such a system.

Spokeswoman Kim Vesely said Ernest Stapleton and Maggie Cordova elementaries, Rio Rancho Middle, Rio Rancho High and Shining Stars Preschool already use Raptor.

The system allows schools to run a check using a person's ID. The check takes 15 to 20 seconds, and Baker said the staff at the school will be looking for something very specific.

"When somebody gives us a state-issued government ID or drivers license, we will run it against the national sex offender registry list," he said. "What we are looking for is to determine if someone is coming on school grounds who is a prior sex offender."

The system will search the National Sex Offender Public Registry and immediately print out a visitor's badge for those not on the registry. The registry is managed by the U.S. Department of Justice.

Rio Rancho district policy states parents, including those who are registered sex offenders, have a right to be on campus. Baker said if a parent is on the registry but has legitimate business on campus, he or she will be escorted by a school employee. Baker said those who cannot provide an ID will also be escorted while on campus.

He said in the future, he also would like to be able to check whether there is a restraining order in place against the visitor. It would be up to the person filing the restraining order to give a copy to the school. He said the school would then enter that into the system.

Baker said for larger events, the school will not do background checks.

"If there are special events, like an open house, that are open to the public, there is no way we can check everybody," he said. "It would take hours to check people in."

Baker said it will cost about \$22,000, and the district will pay an annual license fee of \$9,000.

Live Customer Support Department

- Live customer support is available from trained Raptor staff at Raptor's HQ office.
- Support options include phone, email, chat & remote assistance.
- Raptor provides personalized training for users.
- On-demand training videos are available online 24/7.

 raptor

Innovative Product Pipeline

- Raptor is the nation's leading innovator in visitor management software for K-12 schools.
- Over 9,500 customers communicate ideas for new features and functionality.
- Future product development includes:
 - iPad™ / iPhone™ Raptor application
 - Android™ Raptor application
 - Enhanced student tardy workflow
 - Facial recognition software for offender alerts

raptor

Your Raptor Setup

- Raptor is a web based application
- Hardware installation takes minutes with little or no help from technical staff
- Basic Raptor System includes:
 - Site software access for a full year
 - (1) ID scanner
 - (1) Visitor label printer
 - Case of 3000 visitor labels
 - Free user trainings via live webinar
- Self check-in for return visitors can be processed from a separate computer

Oconomowoc High School implements security scan for visitors

By DONNA FRAKE

Posted: Nov. 4, 2013

Oconomowoc Area School District — A new software program being piloted by Oconomowoc High School will scan visitors' identification to determine whether they can enter the school building.

The software program, Raptor, is expected to be implemented in the next few weeks.

Oconomowoc High School Principal Joseph Moylan explained that the system is an added layer of security for the nearly 1,500 students at the school.

"We scan their (visitors) driver's licenses, and the system does a quick background check — but it doesn't tell us what they've done wrong," he explained.

"It is not meant to be a privacy invasion; it is meant to keep kids safe. It is an added safety check," Moylan said.

The background check screens for violent or sexual offenses — "things that would make you a danger to the environment," Moylan said.

After a visitor is cleared, the program prints a badge with the name, photo, date and time, along with the destination of the guest.

According to the company website, the software "helps schools and community facilities keep unwanted visitors out while tracking those they allow in."

By scanning a visitor's driver's license or other state-issued ID, the program instantly screens for registered sex offenders in all 50 states and can also screen for individuals with restraining orders, custody issues, suspended or expelled students, known gang members, or for any custom alert.

Should a potential threat be identified in the school, the system is designed to send instant alerts to designated officials, including administrators and law enforcement, via email, text messaging or page.

The program can also be used to track and report faculty and volunteer hours as well as student tardies and early signouts. It also allows students arriving late to school to check themselves in.

Moylan said that it is another level of protection for students that began with secured entrances at schools about 10 years ago.

The new software could be in other district schools next year.
